

Prompt Engineering — Quiz 4

Name: _____ Date: _____

Instructions: This quiz contains 12 multiple-choice questions based on the content from Iterative Refinement and Evaluation. Answer all questions.

#1 Which error category describes a situation where the model ignores a negative constraint (e.g., "Do not use lists")?

- A) Reasoning Failure
- B) Constraint Violation
- C) Tone Drift
- D) Phrasing Sensitivity

#2 In the "Critique Loop" pattern, what is the primary purpose of the critique step?

- A) To generate the final answer immediately.
- B) To ask the model to evaluate its own output against a rubric before revising.
- C) To ask a human to rewrite the prompt.
- D) To increase the temperature of the model.

#3 What is the main risk associated with "Vibe Coding" (iterating based on "look and feel" rather than code inspection)?

- A) It is too slow for prototyping.
- B) It requires deep knowledge of Python.
- C) Fragility and inability to fix edge cases because the user doesn't understand the code.
- D) It produces code that is too verbose.

#4 What is "LLM-as-a-Judge"?

- A) Using a lawyer to review AI outputs.
- B) Using a strong model (e.g., GPT-4) to grade the outputs of other models.
- C) A technique to fine-tune models on legal data.
- D) A method to generate court transcripts.

#5 Which phase of the Prompt Engineering Lifecycle involves checking outputs against requirements like accuracy and tone?

- A) Draft
- B) Evaluate
- C) Refine
- D) Deploy

#6 The "Evaluation Gap" refers to the paradox that:

- A) It is harder to generate text than to verify it.
- B) It is significantly easier to generate text than to verify it.
- C) Models are too slow to evaluate.
- D) Humans are faster at generating text than AI.

#7 Which of the following is NOT one of the "3 H's" of evaluation?

- A) Helpful
- B) Honest
- C) Harmless
- D) Human-like

#8 What is a "Golden Dataset"?

- A) A large dataset used for pre-training the model.
- B) A curated set of inputs and "perfect" outputs used as a benchmark for testing.
- C) The most expensive dataset available for purchase.
- D) A set of rejected prompts.

#9 Which of the following is considered a "Hard Metric"?

- A) Creativity
- B) Empathy
- C) Syntax or JSON format compliance
- D) Flow

#10 "Verbosity Bias" refers to the tendency of models (and humans) to:

- A) Prefer shorter, more concise answers.
- B) Rate longer answers as better, even if they contain fluff.
- C) Prefer answers that appear first in a list.
- D) Prefer answers generated by themselves.

#11 Which sampling strategy involves testing high-stakes domains or new templates more frequently?

- A) Random sampling
- B) Risk-based sampling
- C) Stratified sampling
- D) Event-driven sampling

#12 In a "Pairwise Comparison" evaluation, the judge is asked to:

- A) Rate a single response from 1 to 5.
- B) Compare the response to a Golden Answer.
- C) Decide which of two responses (A or B) is better.
- D) Check for forbidden words.
