

Midterm Assignment: Prompt Engineering

Weeks 1–5 Comprehensive Assessment

Prompt Engineering Course
Ankara Medipol University

Due Date: 15.11.2025 until 23.59

Assignment Overview

Total Points: 100

Submission Format: Single PDF document

Due Date: 15.11.2025 until 23.59

Learning Objectives: Demonstrate mastery of fundamental prompt engineering concepts, techniques, and frameworks covered in Weeks 1–5.

Important Instructions

- Submit **ONE PDF file** containing all parts of the assignment.
- Use any AI tool available to you (ChatGPT, Claude, Gemini, etc.) — specify which tool you used.
- Include **screenshots** of your prompts and AI responses for verification.
- Label each section clearly with part numbers (Part 1, Part 2, etc.).
- Follow word count limits strictly ($\pm 10\%$ acceptable).
- **Academic integrity:** Your prompts must be your own work. Explain your reasoning clearly.

Assignment Structure

This assignment consists of 3 parts:

1. **Prompt Comparison Analysis** (30 points)
 2. **Practical Prompt Design** (40 points)
 3. **Critical Reflection** (30 points)
-

1 Part 1: Prompt Comparison Analysis (30 points)

Task

Select ONE domain from the following: **Healthcare, Legal, Marketing, Education, or Engineering.**

For your chosen domain, create TWO versions of a prompt to accomplish the same task:

- **Version A:** A basic, vague prompt
- **Version B:** An improved prompt using advanced prompting techniques

Then, test BOTH prompts with an AI tool and analyze the results.

Deliverables

- a. **Domain & Task Description** (50 words max)
 - State your chosen domain
 - Describe the specific task (e.g., “Draft a patient education handout about diabetes”)
 - b. **Version A: Vague Prompt**
 - Write the vague prompt
 - Include screenshot of AI response
 - c. **Version B: Improved Prompt**
 - Write the improved prompt
 - **Label which techniques you used** (e.g., role prompting, delimiters, few-shot examples, chain-of-thought, structured output)
 - Include screenshot of AI response
 - d. **Comparison Analysis** (200–250 words)
 - Compare the quality, usefulness, and specificity of both outputs
 - Identify at least 3 concrete improvements in Version B’s output
 - Explain WHY the improved prompt worked better (reference course concepts)
-

2 Part 2: Practical Prompt Design (40 points)

Task

Design a complete prompt using **ONE of the following frameworks**:

- CO-STAR Framework (Context, Objective, Style, Tone, Audience, Response)
- RACI Prompt Canvas (Role, Audience, Context, Instructions)
- IDEA Loop (Instruct, Detail, Example, Adjust)

- SMART Prompt Outputs (Specific, Measurable, Actionable, Relevant, Time-bound)

Scenario: You are helping a small business owner create content. Choose ONE of these tasks:

1. Design a customer onboarding email sequence (3 emails)
2. Create a social media content calendar for one month
3. Draft a competitive analysis report for a new market
4. Generate a product launch announcement strategy

Deliverables

- a. **Framework Selection & Justification** (100 words)
 - State which framework you chose and which business task
 - Explain WHY this framework is appropriate for this task
 - b. **Complete Prompt Following Framework Structure**
 - Write your full prompt
 - **Clearly label each framework component** (e.g., “[CONTEXT]:”, “[OBJECTIVE]:”, etc.)
 - Ensure all framework elements are present
 - c. **AI Output**
 - Include screenshot or full text of AI response
 - Highlight or annotate where the AI successfully followed your framework
 - d. **Refinement & Iteration** (150–200 words)
 - Identify at least 2 weaknesses or areas for improvement in the initial output
 - Write ONE refined follow-up prompt that addresses these issues
 - Include screenshot of the improved output
 - Explain what changed and why
 - e. **Framework Effectiveness Reflection** (150 words)
 - Evaluate how well the framework helped you structure the prompt
 - Would you use a different framework for this task? Why or why not?
 - What did you learn about framework selection?
-

3 Part 3: Critical Reflection (30 points)

Task

Synthesize your learning from the first half of the course by reflecting on your prompt engineering journey so far.

Deliverables

Write a structured reflection (400–500 words total) addressing the following:

a. **Skill Progression** (150 words)

- How has your understanding of prompt engineering evolved in the first half of this course?
- Identify one specific “aha moment” or breakthrough in your learning so far
- What was the most challenging concept and how did you overcome it?

b. **Practical Application** (150 words)

- Describe ONE real-world scenario where you could apply prompt engineering in your field/career
- Which frameworks or techniques would you use and why?
- What challenges do you anticipate and how would you address them?

c. **Limitations & Ethics** (100–150 words)

- Identify 2 limitations of AI/LLMs that you must consider when prompting
- Discuss one ethical consideration in your chosen application scenario
- How would you ensure responsible use of AI in your prompts?

d. **Goals for the Second Half** (50 words)

- What aspects of prompt engineering do you want to explore further in the remaining course?
 - What skill gap do you want to close by the end of the course?
-

Submission Checklist

Before submitting, ensure your PDF includes:

- ☐ Cover page with your name, student ID, and submission date
- ☐ Part 1: Domain, both prompts, screenshots, analysis
- ☐ Part 2: Framework justification, labeled prompt, outputs, refinement, reflection
- ☐ Part 3: Critical reflection (400–500 words)
- ☐ Clear labeling of all sections and parts
- ☐ All screenshots are readable and properly captioned
- ☐ AI tool(s) used are specified
- ☐ Word counts are within acceptable range ($\pm 10\%$)
- ☐ Document is formatted professionally (consistent fonts, spacing, headings)

Grading Summary

Part	Description	Points
Part 1	Prompt Comparison Analysis	30
Part 2	Practical Prompt Design	40
Part 3	Critical Reflection	30
Total		100

Tips for Success

- **Start early:** Don't wait until the last day to test your prompts.
- **Iterate:** Try multiple versions of your prompts and choose the best ones.
- **Be specific:** Use exact terminology from the course when explaining your choices.
- **Show your work:** Screenshots and detailed explanations demonstrate your process.
- **Proofread:** Check for clarity, completeness, and professional presentation.
- **Reference course concepts:** Explicitly mention techniques, frameworks, and principles covered in the course.

Good luck! This assignment is your opportunity to demonstrate everything you've learned about prompt engineering.
