

Prompt Engineering

Mehmet Ali Akyol, PhD

Ankara Medipol University

October 31, 2025

Week 14: Course Wrap-Up

Journey Recap

- Weeks 1–3: Foundations, model understanding, prompt principles.
- Weeks 4–6: Patterns, style control, iterative refinement.
- Weeks 7–9: Review, evaluation, multimodal prompting.
- Weeks 10–13: Complex problem solving, domain practice, ethics, trends.
- Week 14: Celebrate achievements, share projects, plan next steps.

Capstone Presentation Format

- 6-minute presentation + 3-minute Q&A per team.
- Cover problem statement, prompt design, evaluation, outcomes.
- Highlight risks addressed and lessons learned.
- Share artifacts: prompt templates, evaluation dashboard, documentation.

- Clarity of problem framing and objectives.
- Effectiveness of prompt strategy and iteration.
- Evidence of evaluation, risk mitigation, and governance.
- Impact and applicability of solution.
- Presentation quality and response to questions.

Key Themes Revisited

- Prompting is a design discipline grounded in clarity and empathy.
- Evaluation and iteration are non-negotiable for trustworthiness.
- Domain expertise and ethics shape responsible deployments.
- Emerging trends demand adaptability and continuous learning.

- Prompt architecture and pattern selection.
- Tone, style, and format control.
- Iterative refinement and evaluation pipelines.
- Domain adaptation, governance, and risk management.
- Trend analysis and strategic foresight.

Personal Reflection Prompts

- Which artifact or workflow are you most proud of?
- What was your biggest breakthrough in prompting mindset?
- Where do you still feel uncertain or want more practice?
- How will you keep skills current after this course?

Peer Appreciation

- Share a shout-out for a classmate's contribution or insight.
- Highlight cross-disciplinary collaborations.
- Note resources or practices you will take into your work.

Next Steps

- Apply prompt frameworks to ongoing projects or internships.
- Contribute to organizational guidelines and training.
- Explore specialized certifications or research collaborations.
- Continue building portfolio of prompt assets and evaluations.

Resources for Continued Learning

- Research newsletters (Alignment Forum, arXiv highlights).
- Tooling communities (OpenAI, Anthropic, Hugging Face forums).
- Ethics and policy trackers (AI Incident Database, EU AI Act updates).
- Practice platforms (prompt marketplaces, prompt ops sandboxes).

Feedback Loop

- Complete course evaluation survey by end of week.
- Provide candid input on pacing, materials, assignments.
- Suggest topics or formats for future cohorts.
- Stay connected: alumni Slack channel invitation to follow.

- Thank you for your energy, curiosity, and collaboration.
- The future of prompt engineering is shaped by practitioners like you.
- Stay bold, thoughtful, and responsible in applying these skills.

Thank You!
