

Week 5 Quiz: Answer Key

Prompt Engineering Course

Answer Key - Multiple Choice (10 points each)

1. **B. Field, tenor, mode**

- Field = topic domain/technical complexity
- Tenor = relationship/power distance
- Mode = spoken/written, planned/spontaneous

2. **B. The relationship and power distance between communicators**

- Tenor manages social relationships: authority, peer, subordinate
- Controls solidarity markers and formality level

3. **B. Sentence length, clause complexity, and passive voice percentage**

- Syntax signature captures structural patterns
- Measurable metrics like avg. sentence length (12–18 words)
- Passive voice percentage (<10%)

4. **B. AI learns boundaries better from contrasts than from positive examples alone**

- Contrasts help define what to avoid, not just what to do
- Strong sample shows target; counter-example shows boundary

5. **B. A specification that defines exactly how output should be formatted for downstream processing**

- Ensures outputs are parse-ready (JSON, CSV, XML)
- Enables automation and integration
- Includes validation hooks

6. **C. “Use short sentences, action verbs, and explicit deadlines”**

- Urgent tone = brevity + action + time pressure
- Opposite: long sentences, passive voice = slower, more neutral

7. **B. Use layered prompts with priority matrices**

- Acknowledge different stakeholder needs
- Establish hierarchy when conflicts arise
- Create modular outputs if needed

8. **B. To automatically validate tone consistency using metrics like sentiment analysis and readability scores**
 - Self-labeling: AI reports its own tone choices
 - Reference comparison: measure similarity to exemplars
 - Automated quality control at scale
9. **C. Multi-dimensional specs provide precise, reproducible style control**
 - Vague instructions like “be professional” are subjective and inconsistent
 - Multi-dimensional specs (field + tenor + mode) are measurable and reproducible
 - Enables consistent AI outputs across multiple generations
10. **C. Whether communication is spoken/written and planned/spontaneous**
 - Mode = delivery channel and planning level
 - Interactive vs. monologic
 - Written-planned vs. spoken-spontaneous
 - Affects sentence structure and completeness

Total Points: /100
