Prompt Engineering Medipol University Mid term

PART 1-Prompt Comparison Analysis

Create a marketing introduction text for a newly launched product. The task is to generate a short clear promotional message suitable for general consumers.

Version A

I firstly asked ChatGPT to write a simple promotional text about a new product

Can you write a short promotional text for a new product

Can you write a short promotional text for a new product

Certainly. Here is a concise, adaptable promotional text suitable for a wide range of new products. If you want it tailored to a specific product, just provide the details and I will refine it.

Introducing our newest innovation—designed to elevate your daily experience with unmatched performance and thoughtful craftsmanship. Engineered to deliver exceptional value, this product combines modern design, advanced functionality, and reliable quality. Whether for work, home, or on the go, it empowers you to do more with ease and confidence. Experience the next level of convenience and discover why this launch is already generating excitement.

Version B

I prompted the AI by establishing its role as a marketing expert and requested it to

Prepare a clear persuasive 200 word promotional text tailored for the target audience.

You are an experienced marketing Professional Create a persuasive and engaging

Promotional text for a new product highlighting its key features and benefits.

The text should be clear concise and appealing to potential customers. Keep it under 200 words and focus on convincing the audience to try or buy the product

You are an experienced marketing Professional. Create a persuasive and engaging Promotional text for a new product, highlighting its key features and benefits. The text should be clear, concise, and appealing to potential customers. Keep it under 200 words and focus on convincing the audience to try or buy the product.

Absolutely! Here's a polished promotional text under 200 words:

Discover the Future of Convenience with [Product Name]!

Say hello to [Product Name], the innovative solution designed to make your life easier, faster, and smarter. With its cutting-edge technology and sleek design, [Product Name] seamlessly blends functionality with style, giving you the ultimate experience every time.

Enjoy **unmatched efficiency**, whether at home, at work, or on the go. Its intuitive interface ensures effortless use, while its durable build guarantees reliability you can trust. From saving you precious time to enhancing your daily routines, [Product Name] is crafted with **your needs in mind**.

But it's not just about performance—[Product Name] also delivers **exceptional value**, offering premium features at an unbeatable price. Join countless satisfied customers who have already transformed the way they live, work, and play.

Don't wait—experience the difference today. Upgrade your lifestyle with [Product Name] and discover why it's the must-have product of the year!

Try it now and see why everyone's talking about [Product Name]!

Prompt Comparison Analysis: Vague vs. Advanced Prompting (Marketing Example)

My main goal in this analysis was to examine how advanced prompting techniques affect the quality and usefulness of AI-generated marketing texts.

In Version A, I asked the AI to create a short promotional text for a new product. The resulting output was generic and quite vague. It provided a general introduction about the product's benefits and performance but lacked specificity, detailed features, or persuasive elements. While readable, it would likely fail to fully engage or convince potential customers.

In Version B, I guided the AI by assigning it the role of an experienced marketing professional, specifying the structure, tone, audience, and word limit. The AI produced a clear, persuasive, and well-structured promotional text that highlighted key features and

benefits The content was tailored to appeal to potential customers focusing on both functionality and emotional engagement.

The success of **Version B** relied on three main techniques First **Role Prompting** (assigning the persona of a marketing expert) ensured professional language and credibility Second requesting a **structured output** helped the AI organize information logically highlighting features benefits and persuasive elements. Third defining the **audience and constraints** (concise under 200 words customer-focused) sharpened the focus resulting in a more actionable and practical output. Essentially these strategies transformed a simple vague instruction into a precise goal-oriented task for the AI producing a higher-quality promotional text.

PART 2-Practical Prompt Design

I chose the **SMART Prompt Outputs framework** because it allows for **Specific Measurable Actionable Relevant and Time-bound** instructions For a 3-email onboarding series it is essential to clearly define the number of emails their purpose content focus and sequence. This framework ensures that AI produces actionable outputs that can be used immediately avoids vague or generic suggestions, and maintains alignment with the company's goals. By specifying audience tone, structure, and measurable outcomes, the framework guarantees a professional and consistent onboarding experience for new customers.

[SPECIFIC]: Create a 3-email onboarding sequence for new customers.

[MEASURABLE]: Each email should have a clear subject line, main message, and call to action.

[ACTIONABLE]: Write the full email content so it can be sent as-is.

[RELEVANT]: Emails should welcome new customers, introduce key features, and guide them to take the next step. Use a friendly and professional tone.

[TIME-BOUND]: Send Email 1 on Day 1, Email 2 on Day 3, Email 3 on Day 7.

Prompt:

“Help me create a 3-email onboarding series for new customers. Include a subject line, full body text, and a clear call to action for each email. Email 1: Welcome and introduction (Day 1). Email 2: Show main features and tips (Day 3). Email 3: Encourage engagement or next step (Day 7). Keep it friendly, professional, and ready to send.”

I need your help creating a 3-email onboarding sequence for new customers. Each email should include a subject line, body text, and a clear Call to Action. Email 1: Welcome and introduction (Day 1). Email 2: Key features and tips (Day 3). Email 3: Encourage engagement or next step (Day 7). Make the tone friendly and professional. Ensure each email is actionable and ready to send.

Absolutely! Here's a polished 3-email onboarding sequence ready to use:

Email 1: Welcome and Introduction (Day 1)

Subject: Welcome to [Product Name]! Let's Get Started 📧

Body:

Hi [First Name],

Welcome to the [Product Name] family! We're thrilled to have you on board. Our mission is simple: make your life easier, more productive, and a little more fun.

To get started, here's your **quick start guide** so you can hit the ground running:

- Explore your dashboard
- Set up your preferences
- Discover essential tools

We're here to support you every step of the way. If you have any questions, our team is just a click away.

Call to Action:

[Get Started Now]

Email 2: Key Features and Tips (Day 3)

Subject: Unlock the Full Potential of [Product Name] 🔑

Body:

Hi [First Name],

By now, you've had a chance to explore [Product Name]. Did you know it has features designed to save you time and maximize your results? Here are a few you shouldn't miss:

- **Feature 1:** How it makes your life easier
- **Feature 2:** Tips to get the best results
- **Feature 3:** Tricks most users don't know

Pro tip: Spend a few minutes exploring these features today—you'll be amazed at what you can accomplish!

Call to Action:

[Discover Features Now]

Email 3: Encourage Engagement or Next Step (Day 7)

Subject: Ready to Take the Next Step? 🚀

Body:

Hi [First Name],

It's been a week since you joined [Product Name]—how's it going so far? We'd love to help you get even more out of your experience. Many users find that taking this next step makes a huge difference:

- **Action Step:** Try [specific feature]
- **Benefit:** Save time, get better results, and enjoy a smoother experience

Don't miss out—your full potential with [Product Name] is just one click away!

Call to Action:

[Take the Next Step]

After checking the first AI output, I saw two problems. Some emails were too general and didn't clearly tell the customer what to do. Also, the Call to Action wasn't always clear.

Refined Prompt:

“Fix the onboarding emails. Make sure each email has a clear action for the customer and a strong Call to Action. Keep the tone friendly and professional. Email 1 should welcome the customer. Email 2 should show key features and tips, and Email 3 should encourage the next step. Emails should be short and ready to send.

The AI now made clear actionable emails with subject lines, body text, and CTAs. This version is ready to use and matches the business goals.

After checking the first AI output, I saw two problems. Some emails were too general and didn't clearly tell the customer what to do. Also, the Call to Action wasn't always clear.

Revise the previous onboarding sequence. Ensure every email is highly actionable and includes a clear Call to Action. Keep the friendly, professional tone. Make sure Email 1 welcomes the customer, Email 2 explains key features and provides tips, and Email 3 encourages engagement or the next step. Emails should be ready to send and concise.

Absolutely! Here's a revised, highly actionable 3-email onboarding sequence ready to send:

Email 1: Welcome and Introduction (Day 1)
Subject: Welcome to [Product Name]! Let's Get Started 🚀
Body:
Hi [First Name],

Welcome to [Product Name]! We're excited to have you on board. You're just a few steps away from unlocking the full potential of your new tool.

Here's how to get started in minutes:

1. Log in to your account
2. Complete your profile for a personalized experience
3. Explore the dashboard and key sections

We're here to help—if you have questions, our support team is ready to assist.

Email 3: Encourage Engagement or Next Step (Day 7)

Subject: Take the Next Step with [Product Name] ✨

Body:

Hi [First Name],

It's been a week since you joined [Product Name]—let's make sure you're getting the most out of it! Many users see the biggest impact by completing this simple action:

- **Next Step:** Try [specific feature or action]
- **Benefit:** Save time, improve results, and enjoy a smoother experience

Don't wait—take this step today and experience the full power of [Product Name].

Call to Action:

[Take the Next Step]

The SMART Prompt Outputs framework worked exceptionally well for this task. By specifying **Specific Measurable Actionable Relevant and Time-bound elements** the AI was able to generate a **concise and structured 3-email sequence**. Each email clearly communicated its purpose, included a Call to Action, and maintained a consistent tone. Using this framework minimized ambiguity and ensured the content could be implemented immediately.

For this task, I would **not choose a different framework** because SMART enforces measurable outputs and clear structure, which are crucial for onboarding emails. I learned that **defining both sequence and purpose** upfront leads to higher quality AI outputs. In future projects, I will use SMART for structured communications and CO-STAR or IDEA Loop for more creative content tasks where tone and style need greater flexibility.

During the first weeks of the course my approach to working with AI changed completely. Initially I thought prompt writing was just about asking questions but I soon realized it is a structured strategic process. A turning point for me came in Part 1 when I compared outputs from simple versus advanced prompts for marketing content. Using techniques like Role Prompting and Structured Output I observed how specifying the AI's persona and format greatly improved clarity and relevance. The most challenging part was ensuring content and numerical constraints such as creating a precise 3-email onboarding sequence. I addressed this through iterative refinement carefully checking outputs and adjusting prompts until the AI reliably followed the instructions. This process significantly strengthened my structured thinking efficiency and confidence in designing precise actionable prompts.

In a real-world scenario I plan to apply these skills to creating a 3-email onboarding sequence for new customers and developing content strategies for small product launches. I would use the SMART Prompt Outputs framework to make sure the sequence is measurable and actionable, specifying email timing, subject lines, and clear Calls to Action. To maintain strategic focus, I would also employ a Chain-of-Thought approach, asking the AI to explain why each email or content idea is relevant before generating it. A key challenge will be maintaining a consistent brand voice across all communications. To address this, I would include a Guardrail instruction requiring the AI to check outputs against a Brand Voice Guide before finalizing them, ensuring that the resulting content is actionable, aligned with the brand, and ready to use.

Two major AI limitations must always be considered. First is hallucination, where the AI may produce inaccurate or misleading marketing claims, which can be mitigated by grounding outputs in verified product information. Second is context window limitations, as the AI may forget earlier instructions during multi-step tasks. Ethically, I must avoid bias in marketing content and ensure inclusivity. This can be achieved by adding explicit instructions such as "Ensure all content is culturally inclusive and non-discriminatory," and requiring the AI to confirm that all generated material is original and free of copyright violations.

Looking ahead to the second half of the course, I aim to deepen my skills in multi-step prompting and develop complex content workflows. I also want to improve my ability to select the most effective frameworks quickly and confidently, allowing me to design high-quality, actionable prompts with less trial and error and more efficient content production.
