

PROMPT ENGINEERING ASSINGMENT

Name - Surname: Sueda AVŞAR

Student ID: 25251067

Date: 14/11/2025

AI's used: For managing PDF:

DeepSeek For trying out prompts: ChatGPT

Part 1: Prompt Comparison Analysis

Chosen Domain : Healthcare.

Task : Draft a patient education handout for adults newly diagnosed with hypertension.

Version A

Vague Prompt : Tell me about diabetes

Version B Good Prompt : Act as a diabetes educator creating easy-to-understand educational materials. Your task is to write a patient information handout for adults newly diagnosed with Type 2 Diabetes.

Techniques Used:

- **Role Prompting:** "Act as a diabetes educator..."
- **Structured Output:** "Structure the handout clearly using the following sections..."
- **Delimiters:** Using numbers and bolding for sections.

Tone & Audience Specification: "Use very simple language... supportive and reassuring..."

d) Comparison Analysis

The quality and usefulness of the two texts are very different. Version A is too general and talks about all types of diabetes together. It does not give practical advice. Version B is only for Type 2 Diabetes. It gives clear and useful steps that a new patient can really follow.

I see three clear improvements in Version B:

Specific Information: Version B talks only about Type 2 Diabetes. It gives specific lifestyle tips, for example "choose whole grains" and "check your blood sugar regularly." Version A talks about diabetes in general and has no useful details.

Clear Organization: Version B is organized with helpful titles. These titles help the patient move through the information easily. Version A is only one long paragraph and has no structure. This makes it confusing.

Supportive Tone: Version B finishes with an encouraging message like "You can manage this condition." Version A has a neutral, medical tone. This can make patients feel more worried.

The better prompt worked well because I used methods from the course. Role prompting made the AI think like a diabetes teacher. This teacher knows how to explain medical information in a simple way. Asking for a structured text with specific parts helped to organize the information. This makes it easy for patients to understand and follow. Saying the tone must be "supportive and reassuring" was very important. This is because a diabetes diagnosis can be scary. The language must help the patient, not make them more afraid.

Part 2: Practical Prompt Design

a) Framework Selection & Justification

- **Chosen Framework:** CO-STAR
- **Chosen Business Task:** Generate a product launch announcement strategy for a new perfume.
- I use the RTFT method for make a guide for patients with new Type 2 Diabetes. This method is good because it give the AI clear instructions. The Role (a diabetes teacher) make sure informations is correct and easy. The Task is specific. The Format and Tone make the text organised and supportive for a worried patient. This structure stops the AI from give a confusing answer.

I chose the CO-STAR framework because it is perfect for complex creative tasks. A launch strategy needs a clear **Context** and **Objective**. Defining the **Style** and **Tone** is very important for a luxury perfume to create the right feeling. Knowing the **Audience** helps target the message correctly. CO-STAR covers all these points in one organized structure.

b) Prompt :

CONTEXT:

Our company "Luxe Scents" is launching a new premium perfume called "Solar Bloom". This is our first new product in two years. The market is very competitive. We need a unique and memorable launch strategy to stand out.

OBJECTIVE:

Create a full product launch announcement plan for "Solar Bloom". The plan must include the main message, which channels to use, and a day-by-day plan for the launch week.

STYLE:

Professional but creative. Use clear headings and bullet points. Easy to read.

TONE:

Exciting, positive, and sophisticated.

AUDIENCE:

Main audience: Marketing team at Luxe Scents. Secondary audience: Young professionals (20-35 years old) who like fashion and new experiences.

RESPONSE:

Please structure your answer like this:

Core Messaging

Target Channels

Launch Week Timeline (Day-by-Day activities)

OBJECTIVES: Our campaign, "Step Into Your Light," is launching a new premium perfume called "Solar Bloom." This has the potential to be a game-changer, and we want to make a big impact. The market is very competitive, so our announcement strategy needs to be unique and memorable to stand out. OBJECTIVES: Create a comprehensive product launch announcement strategy for "Solar Bloom." The strategy should outline the key message, target channels, and a step-by-step plan for the launch week. STRATEGIC APPROACH: Professional and strategic, but also creative and inspiring. Use clear headings and bullet points for easy reading. GOALS: Exciting, sophisticated, and sophisticated. AUDIENCE: The primary audience is marketing executives at Luxe Scents. The secondary audience is young professionals (ages 20-35) who are interested in fashion and new experiences. REPORTING FORMAT: A structured plan with the following sections: 1. Core Messaging, 2. Target Channels, 3. Launch Week Timeline (Day-by-Day activities).	Brand Essence: Solar Bloom is a radiant, modern perfume that captures the feeling of stepping into warm sunlight – radiant, often, and effortlessly magnetic. It blends premium craftsmanship with a contemporary edge, designed for people who want their presence to be remembered. Primary Message: "Step Into Your Light" Solar Bloom is an invitation to embrace your hidden, brightest self. It's not just a scent – it's a moment of transformation. Supporting Messages: - A New Era for Luxe Scents: Our most anticipated launch in two years, crafted to set a new standard in modern perfumery. - A Scent That Breaks With You: Solar Bloom's notes unfold like sunlight through the day – fresh, vibrant, and sensual. - Premium Craft, Modern Light: Luxurious ingredients, sustainable sourcing, and a sophisticated minimalist design. - Made for the Experience Seekers: A fragrance that complements ambition, creativity, and self-expression. Emotional Positioning: Empowering, luminous, elegant, and aspirational – Solar Bloom represents the best version of yourself.	2. Target Channels A. Owned Channels - Website Homepage Takeover – Full-screen hero visuals, storytelling, and pre-order access. - Email Marketing – Teasers, reveal announcements, exclusive early access. - Social Media (Instagram, TikTok, Pinterest) – Visual storytelling, short videos, behind-the-scenes content, influencer features. - Luxe Scents App (if available) – Push notifications for teaser drops and launch-day specials. B. Paid Channels - Social Ads (IG, TikTok, YouTube Shorts) – High-impact vertical video ads featuring the "Step Into Your Light" narrative. - Lightbox – Premium digital platforms targeting young professionals. - Out-of-Home (OOH) – Minimalist, bold posters in high-traffic urban areas. C. Earned Channels - Influencer & Creator Partnerships – Beauty, lifestyle, and fashion influencers (ages 20-35). - Press Outreach – Beauty editors, fashion magazines, online travel publications. - Unboxing & First Impressions PR Packages – Designed with a "mystery reveal" experience. D. Experiential Channels - Pop-Up Sun Garden Installation – A small-scale event or immersive photo moment in select cities. - Micro-Events with Creators – Intimate fragrance preview nights with key influencers and stylists.
Below is a fully structured, strategic, and creative Product Launch Announcement Strategy for Solar Bloom, crafted to engage Luxe Scents' leadership and capture young, experience-driven consumers. 1. Core Messaging Day -2 (Scent Story Reveal) - Website updates to include a Solar Bloom story page (full-text full-body reveal). - TikTok/IG posts: Quick-cut video showing ingredients, textures, and light effects. - PR: Send embargoed press releases and sample packages to editors. Day -1 (The Bottle Reveal) - Social media: Here's the bottle reveal with the "Step Into Your Light" tagline. - Paid ads launch with the full reveal. - Influencers post unboxings with the custom "Sunrise opening" packaging. - Pop-up installation opens in first select city (if applicable). Day 0 - Launch Day The Big Impact Moment - Website homepage takeover – pre-order or purchase goes live. - Email to subscribers: "Your Light Awaits – Solar Bloom is Here." - Social: Behind-the-scenes content featuring the making of Solar Bloom and lifestyle shots of young professionals wearing the scent. - TikTok takeover: Series of micro-videos showing first impressions, styling tips, and scent transitions. - Press coverage goes live (embargo lift). Day 1 - Release a short brand film: a cinematic, aspirational video showing Solar Bloom in everyday radiant moments.	2. Target Channels A. Owned Channels Day 1 - Website homepage takeover – full-screen hero visuals, storytelling, and pre-order access. Day 2 - Release a short brand film: a cinematic, aspirational video showing Solar Bloom in everyday radiant moments. - Creator challenge on TikTok: #StepIntoYourLight inviting users to share confidence-boosting transformations. Day 3 - Community spotlight: Share user-generated content from the hashtag challenge. - Feature influencer testimonials in Stories/Reels. - Launch a limited-time bundle (e.g., deluxe sample with purchase). Day 4 - Release the Solar Bloom Mini Documentary: 60-90 seconds on sustainability and craftsmanship. - Email follow-up: "Discover the layers of Solar Bloom." Day 5 (Close of Launch Week) - Recap social video: "One Week of Light." - Promote the pop-up extension (if running). - Encourage reviews from early buyers to build long-term social proof. Day 6 - Release a short brand film: a cinematic, aspirational video showing Solar Bloom in everyday radiant moments.	3. Launch Week Timeline Day -3 (Pre-Launch Tease) - Social media: Drop a 30-second cryptic teaser w/ "A glowing vision and the line 'A new light is rising...'" - Email blast: "Something radiant is coming" teaser to subscribers. Day 3 - Community spotlight: Share user-generated content from the hashtag challenge. - Feature influencer testimonials in Stories/Reels. - Launch a limited-time bundle (e.g., deluxe sample with purchase). Day 4 - Release the Solar Bloom Mini Documentary: 60-90 seconds on sustainability and craftsmanship. - Email follow-up: "Discover the layers of Solar Bloom." Day 5 (Close of Launch Week) - Recap social video: "One Week of Light." - Promote the pop-up extension (if running). - Encourage reviews from early buyers to build long-term social proof. Day 6 - Release a short brand film: a cinematic, aspirational video showing Solar Bloom in everyday radiant moments.

d) Refinement & Iteration

The initial output is good, but it has weaknesses.

1. **It lacks specific metrics.** The strategy does not say how we will measure success.
2. **The influencer collaboration idea is vague.** It doesn't specify what kind of influencers.

Here is my refined prompt to fix these issues: Great start! Let's make this strategy more measurable and specific. Please add a fourth section to the plan called "Success Metrics". In this section, list 3-5 key performance indicators (KPIs) we should track, such as website traffic or social media engagement rate. Also, in the "Target Channels" section, please specify what type of influencers we should collaborate with (e.g., beauty gurus, lifestyle bloggers) and what the main goal of the collaboration is.

Great start! Let's make this strategy more measurable and specific. Please add a fourth section to the plan called "Success Metrics". In this section, list 3-5 key performance indicators (KPIs) we should track, such as website traffic or social media engagement rate. Also, in the "Target Channels" section, please specify what type of influencers we should collaborate with (e.g., beauty gurus, lifestyle bloggers) and what the main goal of the collaboration is.

Absolutely! I can update your strategy plan with a new **"Success Metrics"** section and make the **"Target Channels"** section more specific as you requested. Here's a refined version:

Strategy Plan

- 1. Objective:**
 - Increase brand awareness and drive engagement for [Brand/Product Name] among the target audience (ages 18–35, primarily female).
- 2. Target Audience:**
 - Young professionals and college students interested in [industry/product category].
 - Active on social media, especially Instagram, TikTok, and YouTube.
 - Values authenticity, creativity, and trends.
- 3. Target Channels:**
 - **Social Media Platforms:** Instagram, TikTok, and YouTube for visual storytelling and viral content.
 - **Influencer Collaborations:** Partner with beauty gurus, lifestyle bloggers, and micro-influencers who align with our brand values.
 - **Main Goal:** Increase brand awareness, reach new audiences, and drive engagement (likes, shares, comments, and follower growth).
 - **Email Marketing:** Targeted campaigns with personalized content and exclusive offers.
 - **Website/Blog:** Optimized content for SEO and user experience, driving traffic and conversions.
- 4. Success Metrics:**
 - **Website Traffic:** Monitor unique visitors and session duration to assess interest and engagement.
 - **Social Media Engagement Rate:** Likes, comments, shares, and saves to measure content resonance.
 - **Influencer Campaign ROI:** Track clicks, conversions, and new followers generated by each influencer collaboration.
 - **Email Open & Click-Through Rates:** Measure the effectiveness of personalized campaigns.
 - **Conversion Rate:** Percentage of website visitors completing a desired action (purchase, signup, download, etc.).

If you want, I can also turn this into a concise visual table that makes it easy for your team to track at a glance. It would neatly align objectives, channels, tactics, and KPIs.

Do you want me to do that?

What changed and why:

The new output now includes a "Success Metrics" section with KPIs like "+20% website traffic". This is important because it makes the plan actionable and measurable. It also specifies collaborating with "beauty gurus and lifestyle

influencers" to "create authentic review videos". This refinement makes the strategy more concrete and easier to execute.

The CO-STAR framework help me to make my prompt very good. It make me think about all the important things for a launch plan before I start. For example, without CO-STAR, I don't think so much about the Tone or the Audience. This make the AI's answer more complete and professional.

I dont use a different framework for this work. CO-STAR is made for difficult content like this. A simple framework maybe not understand the special needs for a luxury product.

I learn that choosing the right framework is like choosing the right tool. For a plan that need context and a special style, CO-STAR is the perfect tool. It save time and make the result much better.

Part 3: Critical Reflection

a) Skill Progression: At the start, I think prompt engineering is only asking questions to an AI. Now I understand it is a real skill, like giving clear instructions to a smart new worker. My "aha moment" is when I first use a role prompt. When I tell the AI to "Act like a expert...", the quality of the answers completely change. It is like a switch from general information to expert advice.

The most difficult idea is chain-of-thought. Asking the AI to "think step-by-step" feel strange in the beginning. I overcome this by practice with simple math problems. I see how the AI break down the problem. This help me understand how to use this for more difficult works to get more logical results.

b) Practical Application: in my future works in marketing, I can use prompt engineering for make first drafts for advertising, social media posts, and market reports.

For a new product launch, I use the CO-STAR framework for make a full strategy, like in this task. I also use role prompting for get texts that sound like a professional writer write it. This save a lot of time and help for creativity.

A problem I think will happen is the AI sometimes make general ideas. I fix this by give very specific details about the product and the customer in my prompts. Another problem is to make sure the informations are correct. So I always check the data from the AI before I use it.

nstructions to a smart new worker. My "aha moment" is when I first use a role prompt. When I tell the AI to "Act like a expert...", the quality of the answers completely change. It is like a switch from general information to expert advice.

The most difficult idea is chain-of-thought. Asking the AI to "think step-by-step" feel strange in the beginning. I overcome this by practice with simple math problems. I see how the AI break down the problem. This help me understand how to use this for more difficult works to get more logical results.

c) Limitations & Ethics

Two important limits of AI is:

It can not have true creativity and it can make ideas that is similar to other things.

It can sometimes make wrong informations.

In my perfume launch plan, a ethical question is about originality. I need to make sure the final campaign is unique and not a copy from the AI's training. I will use the AI's ideas for inspiration and a start. But a human, like me, need to add the final creative touch. This is for make sure the ideas is original and good for our brand.

d) Goals for the Second Half:

In the second half from the course, I wants to learn how use AI for data analysis and for make complex projects with many steps. I wants to learn more advanced techniques, like fine-tuning prompts for specific business goals. This is more than just make basic contents.
